Safety Instructions

The lightning flash with arrow head within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**WARNING:** TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE. DANGEROUS HIGH VOLTAGES ARE PRESENT INSIDE THE ENCLOSURE. DO NOT OPEN THE CABINET. REFER SERVICING TO QUALIFIED PERSONNEL ONLY.

**Class B emissions limits**
This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

**Important Safety Instruction**

1. Do not block any ventilation openings. To ensure reliable operation of the projector and to protect from over heating, it is recommended to install the projector in a location that does not block ventilation. As an example, do not place the projector on a crowded coffee table, sofa, bed, etc. Do not put the projector in an enclosure such as a book case or a cabinet that restricts air flow.

2. Do not use the projector near water or moisture. To reduce the risk of fire and/or electric shock, do not expose the projector to rain or moisture.

3. Do not install near heat sources such as radiators, heaters, stoves or any other apparatus such as amplifiers that emits heat.

4. Clean only with dry cloth.

5. Only use attachments/accessories specified by the manufacturer.

6. Do not use the unit if it has been physically damaged or abused. Physical damage/abuse would be (but not limited to):
   - Unit has been dropped.
   - Power supply cord or plug has been damaged.
   - Liquid has been spilled on to the projector.
   - Projector has been exposed to rain or moisture.
   - Something has fallen in the projector or something is loose inside.

Do not attempt to service the unit yourself. Opening or removing covers may expose you to dangerous voltages or other hazards. Please call Optoma before you send the unit for repair.

7. Do not let objects or liquids enter the projector. They may touch dangerous voltage points and short out parts that could result in fire or electric shock.

8. See projector enclosure for safety related markings.

9. The unit should only be repaired by appropriate service personnel.
Intended Use Statement

- Operation temperature:
  - For 0 - 2500 ft, 5 °C ~ 40 °C
  - For 2500 - 5000 ft, 5 °C ~ 35 °C
  - For 5000 - 10000 ft, 5 °C ~ 30 °C
- Maximum Humidity:
  - Operating: 10%~80%RH (Max.), Non-condensing
  - Storage: 5%~95% RH, Non-condensing

The ambient operating environment should be free of airborne smoke, grease, oil and other contaminants that can affect the operation or performance of the projector.

Use of this product in adverse conditions will void the product warranty.

Safety Information

Please read, understand, and follow all safety information contained in these instructions prior to the use of this projector. Retain these instructions for future reference.

<tr>
<td><strong>⚠️ Caution:</strong> Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury and/or property damage.</td>
</tr>
<tr>
<td><strong>⚠️ Warning:</strong> Hazardous voltage</td>
</tr>
</tbody>
</table>
⚠️ **Warning**

**To reduce the risk associated with hazardous voltage:**
- Do not modify this product in any way.
- Do not attempt to service this projector.
- There are no user-serviceable parts. Service to be performed only by a Optoma authorized service provider using Optoma approved system components.
- Do not use the wall power supply in a wet environment.
- Do not use with a damaged wall power supply. Replace damaged part prior to use.

**To reduce the risk associated with fire and explosion:**
- Do not immerse the projector in any liquid or allow either to get wet.
- Use only Optoma approved power supply.

**To reduce the risks associated with choking:**
- Keep all small parts like the remote control battery away from young children and pets.

**To reduce the risk associated with hazardous voltage, impact, tripping, and intense visible light:**
- Do not use this projector around unsupervised children.

⚠️ **Caution**

**To reduce the risks associated with hearing loss:**
- Be sure to read earphone manufacturer’s instructions with respect to volume level.
- User is responsible to set a safe volume level.

**To reduce the risk associated with explosion, and/or chemicals from a leaking batteries:**
- Use only with battery type CR2025.
- Orient the battery’s plus (+) and minus (-) terminals of the batteries according to the markings found on the remote control.
- Do not leave the battery in the remote for an extended period of time.
- Do not heat or expose the battery to fire.
- Do not disassemble, short, or recharge battery
- Do not carry batteries loose in your pocket or purse.
- Avoid eye and skin contact in the event that battery leaks.
- Do not recharge the battery near a heat source or in extremely hot conditions.
To reduce the risk associated with environmental contamination:

- Dispose of all system components in accordance with applicable government regulations.

To reduce the risks associated with LED bright light:

- Do not stare directly into the projector lens.

To reduce the risks associated with tripping and falling:

- Position the charging cord and data cables so that they are not a tripping hazard.

**Important Note:** Do not expose the projector to direct sunlight in a closed space such as a vehicle.

Regulatory Notices

FCC STATEMENT - CLASS B
This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual may cause interference to radio communications. It has been tested and found to comply with the limits for a Class “B” computing device pursuant to Subpart B of Part 15 of the FCC Rules, which are designed to provide reasonable protection against such interference when operated in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTICE: This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Industry Canada regulatory information
Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.
The user is cautioned that this device should be used only as specified within this manual to meet RF exposure requirements. Use of this device in a manner inconsistent with this manual could lead to excessive RF exposure conditions.
This Class [B] digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe [B] est conforme à la norme NMB-003 du Canada.

INSTRUCTIONS TO USERS: This equipment complies with the requirements of FCC equipment provided that the following conditions are met. If the cables include a EMI ferrite core, attach the ferrite core end of the cable to the projector. Use the cables which are included with the projector or specified.

Note: Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Complies with IDA Standards DA103121
**CE Statement**

**ElectroMagnetic Compatibility Statement:** Meets 2004/108/EC Directive

**WEEE Statement**

The following information is only for EU-members States:

The mark shown to the right is in compliance with Waste Electrical and Electronic Equipment Directive 2002/96/EC (WEEE). The mark indicates the requirement NOT to dispose the equipment as unsorted municipal waste, but use the return and collection systems according to local law.
Introduction

Package Contents

Your projector comes with all the items shown below. Ensure that you have all the items, and contact your local reseller or service center if anything is missing.

12. Up/Down/Left/Right | Press to navigate through the On-Screen Display (OSD) Menu items.
13. Back ⏪ | Press to return to the previous page.
15. Volume up 🔊 | Press to increase the volume.

**Note:** Home and Back buttons can be used only in Media mode.
Installing the Remote Control Battery

1. Remove the battery holder by holding down the side release firmly and pulling out the battery holder.

2. Insert a CR2025 coin cell battery and align the polarity correctly according to the marking in the battery holder.

   **Note:** *When you use the remote control for the first time, there is a plastic sheet between the battery and its contact. Remove the sheet before use.*

3. Replace the battery holder.

Operating Range with Remote Control

   **Note:** *Actual operating range may slightly differ from the diagram. Additionally, a weak battery reduces or eliminates the operating range of the remote control.*

Turning On/Off the Projector

Turning Your Projector On

**Note:** Turn on the projector before you turn on the source (computer, DVD player, etc.). The Power button light blinks amber until pressed.

1. Connect the power cord with AC adapter and appropriate signal cables to the projector.
2. Remove the lens cap.
3. Press the Power button.
4. Turn on your source (computer, DVD player, etc).
5. Connect your source to the projector using the appropriate cable.
6. The input source is determined by the last connected input source. (By default, the input source of the projector is set to Multimedia). Change the input source of the projector if necessary.

Turning Your Projector Off

**Note:** The “Press Power Button to Turn Off Projector” message will appear on the screen. The message disappears after 5 seconds or you can press the Menu button to clear it.

1. Press the Power button. Follow the instruction displayed on screen to properly turn off the projector.
2. Press the Power button again. The cooling fans continue to operate for 3~5 seconds.
3. Disconnect the power cord and AC adapter from the electrical outlet and the projector.
Adjusting the Projected Image

Raising the Projector Height

Raise the projector to the desired display angle, and use the front tilt adjustment wheel to fine-tune the display angle.

Lowering the Projector Height

Lower the projector, and use the front tilt adjustment wheel to fine-tune the display angle.

Important Note: To avoid damaging the projector, ensure that the adjustment wheels are fully retracted before moving the projector or placing the projector in its carrying case.

Adjusting the Projector Focus

Rotate the focus ring until the image is clear. The projector focuses at distances ranging between 2.82 ft to 5.64 ft (86 cm to 172 cm).
Adjusting Projection Image Size

- 100" (254.0 cm)
- 90" (228.6 cm)

User Controls

Using the On-Screen Display

1. The projector has a multi-language On-Screen Display (OSD) Menu that can be displayed with or without an input source.
2. Press the Menu button on the control panel or the remote control to enter the Main Menu.
3. To select an option, press the ▲ or ▼ buttons on your projector's control panel or remote control.
4. Use the ▲ or ▼ buttons on the control panel or remote control to adjust the settings.
5. To exit the OSD, press the Menu button directly on the control panel or the remote control.

Main Menu

The Main menu allows you to select the input source, adjust the volume, select the display mode, and configure the brightness, contrast, image, display, and setup settings.

<table>
<thead>
<tr>
<th>Input Source</th>
<th>VGA</th>
</tr>
</thead>
<tbody>

<tr>
<td>Setup</td>
<td></td>
</tr>
</tbody>
</table>

- **Input Source**: Select your projector’s input source. The options are: VGA, HDMI / MHL, and Media.
- **Volume**: Adjust the volume.
  
  **Note**: Audio output is not supported in VGA mode.
- **Display Mode**: Optimize the display image. The options are: Bright, PC, Cinema, Photo, and ECO.
- **Brightness**: Adjust the brightness of the image.
- **Contrast**: Adjust the display contrast.
**Image**

The Image menu allows you to modify various image settings, such as 3D, format, zoom, color temperature, color space, and others.

<table>
<thead>
<tr>
<th>Image</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>Frequency</td>
<td>0</td>
<td></td>
</tr>
<tr>
<td>Phase</td>
<td>0</td>
<td></td>
</tr>
</tbody>
</table>

- **3D**: Turn the 3D function on or off.
- **3D Sync. Invert**: Turn the 3D sync. inverter option on or off.

  **Note:**
  - 3D/3D Sync. Invert cannot be changed when you select image settings.
  - In 3D mode, the maximum supported input timing is 1024x768 @ 120Hz.

- **Format**: Select the format to adjust how the image appears. Options are:
  - **Auto**: Maintain the aspect ratio of the image projector according to the input source.
  - **4:3**: The input source scales to fit the screen and projects a 4:3 image.
  - **16:9**: The input source scales to fit the screen and projects a 16:9 image.
  - **16:10**: The input source scales to fit the screen and projects a 16:10 image.

- **Zoom**: Zoom in or zoom out the image. Options are: 50%, 75%, 100%, 125%, 150%, 175%, or 200%.

- **Color Temperature**: Select the color temperature. Options are: **Warm**, **Medium**, and **Cold**.

  **Note:** The Color Temperature function is not supported in Bright, Eco, and 3D modes.

- **Color Space**: Select an appropriate color matrix type. Options are: **Auto**, **RGB**, and **YUV**.

  **Note:** The Color Space function is supported only in HDMI mode.

- **Frequency**: Change the display data clock frequency to match the frequency of your computer’s graphics card. If you see a vertical flickering wave, use the Frequency control to minimize the bars. This is a coarse adjustment.

  **Note:** The Frequency can be adjusted only in VGA mode.
- **Phase**: Synchronize the signal timing of the display with the graphic card. If the image appears to be unstable or flickers, use the Phase to correct it. This is a fine adjustment.

  **Note**: The Phase can be adjusted only in VGA mode.

**Display**

The Display menu allows you to modify the display settings, such as keystone and position.

- **Auto Keystone**: Select On to automatically adjust image distortion caused by tilting the projector.

  **Note**: The Auto Keystone function can be only used to adjust the image distortion vertically. If the Auto Keystone is off then auto ceiling mount will be automatically disabled.

- **Keystone**: Adjust image distortion caused by tilting the projector (+/-40 degrees).

  **Note**: If you adjust the keystone degree manually then the Auto Keystone function will be automatically switched off.

- **Projection**: Select the projection mode, depending upon how the projector is mounted.
  
  - **Auto Keystone**: On
    
    - No reverse
    - Left/Right reverse
  
  - **Auto Keystone**: Off
    
    - No reverse
    - Left/Right reverse
    - Up/Down reverse
    - Up/Down and Left/Right reverse
Setup

The Setup menu allows you to choose the default OSD language, modify boot-up source, set sleep timer, and other options.

Setup menu:

- **Language**: Set the language for the OSD. Options are: English, Germany, French, Italian, Spanish, Portuguese, Polish, Dutch, Russian, Swedish, Greek, 中文 (繁), 中文 (简), Japanese, Korean, and Turkish.

- **Boot-Up Source**: Select the projector’s boot-up source. Options are: Auto, VGA, HDMI / MHL, and Media.

  Note: If the Boot-Up Source is set to “Auto” then at each boot-up of the projector the input source is always chosen the same as in previous session.

- **Direct Power On**: Choose On to activate Direct Power mode. The projector will automatically power on when AC power is supplied, without pressing the Power button on the projector control panel or on the remote control.

- **Sleep Timer**: Set the countdown timer interval. The countdown timer will start, with or without a signal being sent to the projector. The projector will automatically power off when the countdown has finished. Options are: Auto, Off, 30 min, 1 hour, 3 hours, 8 hours, 12 hours.

  Note: If the Sleep Timer is set to “Auto” then the project will automatically power off after 15 minutes if no signal has been detected.
- **Reset**: Reset all settings to its factory default, including computer sources and video source settings. After choosing this option, a confirmation message appears on the screen. Select “Yes” to confirm or “No” to cancel reset.

- **Ver.**: View the current projector’s firmware version.
**Advanced**

The Advanced menu allows you to change settings for **iDevice**, Mute, Saturation, and Hue.

![Advanced settings menu](image)

- **iDevice**: Select **On** to display the best color reproduction when projecting images from an iDevice (iPhone/ iPad/ iPod) through Lightning HDMI adapter.
  
  **Note:** *The iDevice option is available only if the input source is HDMI.*

- **Mute**: Select the Mute mode. Options are: **AV Mute** (mute both audio and video), **Audio** (mute audio only), and **Video** (mute video only).
  
  **Note:** *The function of the Mute button (️) on the remote control depends on the selected “Mute” option in the OSD menu.*

- **Saturation**: Adjust the saturation of the image.
  
  **Note:** *Saturation can be only adjusted in HDMI mode with supported video timings 1080p/i, 720p, and 480p/i.*

- **Hue**: Adjust the hue of the image.
  
  **Note:** *Hue can be only adjusted in HDMI mode with supported video timings 1080p/i, 720p, and 480p/i.*
# Multi-Media Introduction

Multi-media format supported:

## Photo Format

**Note:**

- Animations are not supported when viewing MS PowerPoint files.
- When projecting files, some documents may not be displayed the same as shown on the screen of a PC.
How to set-up File Type for Multi-Media with USB

Note:

1. A USB flash disk must be plugged into the projector if you want to use the multimedia USB function.
2. Please don't connect USB port for camera since it would be exist compatibility problem.

Follow these steps to playback the Photo, Video, or Music files on your projector:

1. Connect the power cable with AC adapter and turn on the projector by pressing the Power button.

2. Plug in a **USB flash disk** to your projector.

The Multi-Media menu opens.

**Note:** To open the Main Menu, press the **Menu** button on the remote control or long press for 1 second the **Menu** button on the control panel of the projector.
3. Select the **HD Media** menu. 
The **HD Media** menu opens.

4. Access the **USB** menu and select the multimedia files: **Photo**, **Video**, or **Music**. Or select the **Settings** option to change settings for **Photo**, **Video**, or **Music**.

5. Select the file you want to open.

**Note:** The maximum allowed file name length is 28 characters.
How to set-up File Type for Multi-Media with MicroSD

**Note:** A microSD card must be plugged into the projector if you want to use the multimedia microSD function.

Follow these steps to playback the Photo, Video, or Music files on your projector:

1. Connect the power cable with AC adapter and turn on the projector by pressing the **Power** button.

2. Plug in a **MicroSD card** to your projector.

The Multi-Media menu opens.

**Note:** To open the Main Menu, press the **Menu** button on the remote control or long press for 1 second the **Menu** button on the control panel of the projector.
3. Select the **HD Media** menu.  
The **HD Media** menu opens.

4. Access the **SD Card** menu and select the multimedia files: **Photo**, **Video**, or **Music**.  
Or select the **Settings** option to change settings for **Photo**, **Video**, or **Music**.

5. Select the file you want to open.

**Note:** The maximum allowed file name length is 28 characters.
How to set-up File Type for Multi-Media with Internal Memory

**Note:** A microSD card must be plugged into the projector if you want to use the multimedia microSD function.

Follow these steps to playback the Photo, Video, or Music files on your projector:

1. Connect the power cable with AC adapter and turn on the projector by pressing the **Power** button.

The Multi-Media menu opens.

**Note:** To open the Main Menu, press the **Menu** button on the remote control or long press for 1 second the **Menu** button on the control panel of the projector.
2. Select the **HD Media** menu.
   The **HD Media** menu opens.

3. Access the **Internal Memory** menu and select the multimedia files: **Photo**, **Video**, or **Music**. Or select the **Settings** option to change settings for **Photo**, **Video**, or **Music**.

4. Select the file you want to open.

**Note:** The maximum allowed file name length is 28 characters.
Multi-Media Main Menu

Multi-Media SETTINGS for System, USB, MicroSD, and Internal Memory

*The multi-media settings menu allows you to change settings for System, Photo, Video, and Music.*

*Note:* Multi-media setup menu and set are the same for the USB, MicroSD, and Internal Memory.
**System Settings**

Access the system settings menu. The system settings menu provides the following options:

- **Version**
  View the current projector’s firmware.

- **Update**
  Update the projector firmware only from the **USB** stick.
**Photo Settings**

Access the photo settings menu. The photo settings menu provides the following options:

- **Display Ratio**
  Select the display ratio of the photo as *Original* or *Full Screen*.

- **Slideshow Pattern**
  Select what slideshow effect you want. Options are: *Random*, *Ring Diffusion*, *Middle Enlarge*, *Expand Blink*, *Window Shades*, *Linear Interaction*, *Cross Interleaved*, *Banding Alternate*, *Rectangle Enlarge*.

- **Slideshow Duration**
  Select the slideshow duration. The image will automatically switch to the next photo after the time out. Options are: *10 sec*, *30 sec*, *1 min*.

  **Note:** *Slideshow Duration, and Slideshow Pattern function only support Slideshow mode.*
**Video Setup**

Access the video settings menu. The video setting menu provides the following option:

---

### Display Ratio

Select the display ratio of the Video.

- **Letter box**: If the video source does not fit a 16:10 screen then the video image is stretched equally in the horizontal and vertical directions to fit the screen. Therefore parts of the video are cropped at the top and bottom (left and right) sides and appear as “black bars” around the video.

- **Cut screen**: Choose to display the video in its native resolution without scaling. If the projected image exceeds the screen size then it will be cropped.

- **Full screen**: Regardless the native aspect ratio, the video image is stretched non-linearly in the horizontal and vertical directions to exactly fit the 16:10 screen. You will not see the "black bars" around the video image but the proportions of the original content may be distorted.

- **Original screen**: Choose to display the video image in its native resolution without scaling. If the video resolution is lower than 1280x800 then you will see "black bars" around the edges of the video image. If the resolution is higher than 1280x800 then the video is displayed in 1280x800 resolution.

### Repeat Mode

Select the video repeat mode. Options are: **Sequence, Single, Random, Once**.
Music Setup
Access the music settings menu. The music settings menu provides the following option:

- **Repeat Mode**
  Select the music play mode. Options are: **Sequence**, **Single**, **Random**.
Other Multi-Media Connections

*Using the multi-media menu, you can project files from the PC or mirror the screen of your portable device.*

**Projecting Files from the PC**

Follow these steps to project files from your PC:

1. Connect the power cable with AC adapter and turn on the projector by pressing the **Power** button.

2. To access files from the hard disk of your PC, plug in one end of a USB-A cable to your PC and the other end of the USB cable to the projector.
3. Select the **Connect to PC** menu.

   The **Connect to PC** menu opens.

4. Select the file you want to project on the wall.

   **Tip:** *In Windows 10 and Mac OS 10.9, you can also save files from your PC directly to the projector's internal memory or to the microSD card that has been inserted into the projector.*
Mirroring the Screen of the Portable Device

Follow these steps to mirror the screen of your portable device:

1. Connect the power cable with AC adapter and turn on the projector by pressing the Power button.

The Multi-Media menu opens.

2. Select the HDCast Pro menu.
The HDCast Pro menu opens.

3. Do one of the following:
   - Depending on the operating system of your mobile device, open the App Store (iOS) or Google Play (Android) and install the HDCast Pro app on your mobile device.
   - Scan the QR code on the HDCast Pro menu with your mobile device and then follow the on-screen instructions to install the HDCast Pro app.
     If you are using a laptop, download HDCast Pro app from www.optoma.com/hdcastpro website.

4. Plug in a Wi-Fi dongle to your projector.

5. Connect your portable device via Wi-Fi to the projector. An example connection parameters are as follows:
   - SSID of the projector: HDCastPro_701F96D7
   - Wi-Fi password: 40600759
     Note: The projector SSID and Wi-Fi password varies depending on the connected Wi-Fi dongle.

6. Open HDCast Pro app on your portable device.
   The following screen opens.
7. Select **HDMirror** (Android) from the menu to start mirroring the screen of your portable device.
Appendices

Troubleshooting

If you experience problems with your projector, see the following troubleshooting tips. If the problem persists, contact your local reseller or service center.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
</table>
| No image appears on the screen | • Ensure that the projector is turned on.  
• Ensure that you have chosen the correct input source on the OSD Main > Input Source menu.  
• Ensure the external graphics port is enabled. If images are not displayed properly, please upgrade the video driver of your computer.  
• Ensure that all the cables are securely connected.  
• Ensure that the pins of the connectors are not bent or broken. |
| Partial, scrolling or incorrectly displayed image | • If you experience difficulty in changing resolutions, or if your monitor freezes, restart all the equipment and the projector.  
• If images are not displayed properly, please upgrade the video driver of your computer. |
| The screen does not display your presentation | • If you are using a portable computer, press the toggle output settings. Example: [Fn]+[F4]. |
| Image is unstable or flickering | • Adjust the phase in the OSD Main > Image > Phase menu (in PC Mode only). |
| Image has vertical flickering bar | • Adjust the frequency in the OSD Main > Image > Frequency menu (in PC Mode only). |
| Image is out of focus | 1. Adjust the focus ring on the projector lens.  
2. Ensure that the projection screen is within the required distance from the projector (2.82 ft [86 cm] to 5.64 ft [172 cm]). |
| The image is stretched when displaying a 16:9 DVD | • The projector automatically detects the input signal format. It will maintain the aspect ratio of the projected image according to input signal format with an Original setting.  
• If the image is still stretched, adjust the format in the Main > Image > Format menu in the OSD. |
