

C06 System (838) Firmware Update – OTA Guide

C06 Firmware can be updated using OTA.

1. **OTA (Over the Air) Method** – OTA Firmware Update is supported using Wi-Fi. The Wi-Fi USB Dongle must be installed in the Wi-Fi Display Port (USB on the far right of the projector) and connected to an active Wi-Fi network.
2. From the Launcher (Home Screen), go to Network Settings > Wireless Settings (Wi-Fi Display). After connecting to a Wi-Fi Network, press the menu button on remote or the keypad on the projector:

3. Go to Info > Firmware Version > Firmware Update. The following will appear – follow the prompts to complete the update.
4. After the update is complete, you MUST update the LAN Firmware. The LAN Firmware is available on the UHD51A Webpage (<https://www.optoma.com/us/product/uhd51a> -- downloads section) or at WW Support Download Page at <http://www.optoma.com/support/download>.

SYSTEM Update

ID: FC2325-037FBE
